

BOSTON

CLOTHING

We received this week to assort up our mid-summer stock, 75 suits and 100 pairs of Pants. Like the canine our pants are londest during dog days. If you don't want loud pants we have still small patterns which instill feeling of contempt and satisfaction to the wearer. If you buy from us you will be sure to get a fit, also a fitting price. There'll be no breeches of promise on our part credit and our promises are all as reliable as our breeches. As a fitting clothes to this article we may as well admit it was written by a lean and slippery pant-a-loon.

WAS KILLED BY LIGHTNING.

ROLAND, Aug. 2. A fierce thunder-storm passed over this place last evening, accompanied by a heavy fall of rain. James Lane, of Roseland, while feeding his horses in the stable of Emerson Leitch, was struck with lightning and instantly killed. He leaves a widow and seven children.

15 YEARS FOR A FIRE-BUG.

MONROVIA, Aug. 3. The Wapella fire-bug, John Gordon and Frank Inos were today sentenced, Gordon receiving 15 years and the 1st Inos 5 years in the Manitoba penitentiary. David McLung, convicted of poisoning a horse, was given 5 years, and Mike Brennan, convicted of bringing stolen goods into Canada, seven years. The four prisoners will be taken from here on Sunday morning in charge of Sheriff Murphy, and a police escort to Stony Mountain.

CENTRAL AMERICAN WAR.

ALL IS QUIET AT PRESENT. DEFEAT OF GEN. RIVAS FORCES. PHILADELPHIA BY SPAIN.

CINCO, Ill., Aug. 1. La Libertad, San Salvador, advises from the capital of the Republic that General Asturias has been ordered from the frontier with about 2,000 men immediately upon the outbreak of the revolt headed by Gen. Rivas. General Asturias hastened with all speed to the capital. General Rivas' forces had captured the artillery barracks, but the two troops in charge, not fought, deepened before they surrendered. The Indians then pillaged several houses and a panic ensued. Rivas' forces were finally defeated and peace was restored. It is stated that Guatemala has withdrawn her forces from the frontier and that all is quiet at present. There is no telegraphic communication with Guatemala.

BRIERWOOD.

Just one word to "Big Bear". There was no reference in the writer's letter to the Methodist church. "Big Bear" and "Big Bone" alone was the person referred to in business and laughing, as the people who know I am not well aware. His study letter is not worth answering.
We were allowed a chance at Inspector Spaulding's report to the trustees of Education Point School. Mr. S. says that Mr. Hudson has placed the school in the front rank in the province.
M. G. C. M. Editor of Brown school, spent a couple of hours with Mr. Atchison yesterday, as a teacher, and G. C. M. is considered an apt teacher too.
Who had a fine shower last evening, warm weather today, consequently the grain is ripening very fast, wheat harvest will be general a week from Monday.
Mr. W. H. Gray is getting out his Maxwell binders. He has disposed of a car of it already, and is still taking orders.
Mr. Booth and Mr. English picked eleven pairs of Saskatoon yesterday in about seven hours, on Mr. Joly's farm. George and Harry are saying they say it pays better than writing our correspondence.
The Brierwood Orangemen held their monthly meeting on Wednesday evening, they sent a donation to the French Evangelization scheme, carried on by Father Chappin. It is the hope of these good brethren will not stop here but begin a little home evangelization and increase the circle of their usefulness gradually first seeing that they neglect not their own household.

CLOSE SEAL SEASON.

NEGOTIATIONS AGAIN OPENED BETWEEN BRITAIN AND THE U. S.
TORONTO, Aug. 1. A Washington dispatch says: The Behring sea controversy, of which the full text has just been printed, shows the responsible party for the halting of negotiations between the Governments of Great Britain and the United States last winter for the close season for the catching of seals in Behring sea, at a time when the whaling fleet of the British Government was engaged in satisfaction of both Governments, was the Government of Canada as represented by Tupper, minister of fisheries. The dispatch: "In the interests, it would seem of Canadian sealers, he insisted the seals were not in danger of extermination. The claim that they were being destroyed by shooting on the part of British sealers had not been maintained and that the seals would continue to increase in perpetuity provided that the United States should take better care of them than it now does. The representative of Tupper, the dispatch continues, "appear to have convinced the British minister and the British foreign office that negotiations which they were conducting would not benefit, but would injure Canadian sealers, and for that reason they were suspended. Negotiations were renewed, evidently because the British Government was led to believe the representatives of the Canadian Government could not wholly be relied upon as to the essential facts, and that there really was danger in the extinction of seals from unscrupulous killing in all seasons. In other words the fact that negotiations for a close season have been resumed, is an indication that the British Government no longer places absolute confidence in the representations which were made to it on behalf of the Dominion Government and that it has come to the conclusion that it is important for the interests of commerce and for sea life in Alaska for the perpetuation of which the British Government has just as much interest as the American Government, that there shall be a season during which seals cannot be destroyed.

TEACHERS PASSED.

RESULTS OF THE RECENT PROVINCIAL EXAMINATIONS.

SUBJECT MATTERS APPOINTED TO EXAMINE AND RECOMMEND TEXT-BOOKS. A LONG LIST OF SUCCESSFUL CANDIDATES.

The provincial advisory board of education met on Saturday, the members present being the Metropolitan of Rupert's Land in the chair, Dr. Bruce, Prof. R. R. Cochran, A. McLeod, J. D. Hunt and D. McIntyre. The report of the different sub-examiners was presented.

The following persons were granted first class grade certificates on the result of the examinations: C. Rossie Brown, W. J. Crum, A. Fred Hammond, Charles W. St. John, D. A. Weckare, Ralph Esulton, Annie M. Mill gun.

The following will be granted first class certificates of the lowest grade on passing the teachers' examination in 1891 in the subjects in which they failed this year: Stephen, Middleton, Fred A. Morrison, Cecil A. Parr, Herbert W. Wadje, Marion McDougall, Ida Thompson.

Second class certificates grade A: Herbert W. Riggs, Stephen, Middleton, Fred A. Morrison, Cecil A. Parr, Herbert W. Wadje, Marion McDougall, Ida Thompson.

Second class grade B: Donald Gunn, John Strachan, Arnold Hartley, George A. Tounson, John H. Davidson, Joseph Knight, Charles F. Wood, John L. Brown, Robert M. Reid, Katie Anderson, Roy Alwender, Maggie Beveridge, Izard D. Green, Laura Cull, Lily A. Hill, Carrie Harris, Mary Martin, Nellie Moor, Laura Meit, Edith M. Kochie, Mary McKinnon, Mary Isabella Jones, Beatrice MacMurray, Lydia Buchanan.

Third class grade A: John W. L. Donnelly, H. Thert Graham, W. J. S. Sier, Thomas F. Woodhead, Robt. A. King, Geo. H. Measham, Seraph S. Blackwell, Louis John Lender, John Beckett, Tryphena Phinney, A. A. McPhail, Kenneth S. Heeg, Wilfred Richardson.

Third class grade B: Thompson Ball, John Baxter, Fred Crossman, James G. Goodshow, Wm. J. Harrington, Alfred How, A. W. Kemner, Frank Kelly, James McIvor, Warren McVicar, Wm. John Robertson, Amy M. Allison, Grace Brinkman, Lillian Campbell, Corine Gibson, Mary Carruther, Alice Lamb, Frances McCormick, Bertha Dewey, Callista Post, Georgina Riddell, Mary Seande, Catherine Wemyss, John Adam, Creighton, George A. Cunningham, John M. Ellis, Samuel Fick, Herbert W. Foster, Arthur Martin, Albert E. Miller, Charles Allen Reid, Geo. H. Ross, James D. Taylor, Edmund G. Telford, Lela M. Cunningham, Jennie Gilliland, Kate Lee, Agnes B. Leclair, Mary McKinnon, Alice Stepping, Jennie White, John E. Bell, John H. Bick, Duncan C. McKillop, Agnes L. M. Laid, Richard W. McLeod, Sue Brown, Anne Campbell, Jan. Cleve, Laid, Lydia A. Campbell, Annie Fraser, Ellen Charlotte Kerr, Alice Macdonald, Helen S. McInnes, Jennie McLeod, Jennie Patterson, Alfred Rogers, Albert B. Aldrich, Clara W. Mathers, John Wood, Alvin R. Taylor, Phoebe L. Boyd, Jessie Harris, Albert M. Hillard, Kate McDonald, Frances A. McEwen, Ida M. Vanhousen, Jennie Vanhousen, Isaac F. Brooks, Alice Hutton, Leo M. Felt, Helen Hubbard, Maggie Logan, Lizzy Yory, Agnes Young, Harry M. Cartmell, David Venech, Thomas W. Thompson, Bessie L. Murray, George, Arnett, Wm. Cranston, W. W. Greenway, John Gosson, W. A. Haney, S. E. Young, Jennie Kinley, McKay, Ed. Ryan Fraser, Andrew Richardson, David Long, Maud Atlock, Annie E. Greenway, Nannie M. Kinley, Mary E. Lattner, Alice Stewart, Nettie Taylor, Edith Waugh, Mrs. G. P. Wilson, Mary Fraser, Robt. T. Drew, Walter Drew, Rufus Marr, Hector McArthur, Edith W. Wood, James A. Wilson, Kate Calder, Alice Sax Cook, Joan Hamilton, Annie B. Jamieson, Jennie V. Pede, May Ross, Ida Sinclair, Ella A. Wilson, Aggie M. Voemann, Wm. Elder, J. A. McDonald, Arthur Mosdy, Mary Buckingham, Bella Ingham.

The following received third class certificates on the result of their second class examination: Grade A: Hortie Agnew, E. P. Clark, George E. Curtis, Frank C. Drummond, S. S. Gannon, Percy Hargrave, Henry Heise, Thos. Laidlaw, Hamilton Leung, Laura Brown, Lizzy Callaway, Mary Callaway, Alice Clements, Annie Davis, Abbie Gordon, Midge Laid, Mary Meyer, Christina McLeod, Isabella Neilson, Jessie Sutton, Samuel A. Baird, Hiram Hall, Maria C. Gillanders, Annie M. Miller, Emily G. Miller, Kate McLeod, Mary C. McNab, Lottie Smith, Margaret J. Wilson, Robt. G. Wood, Eva Mackie, Maggie E. Mackie, Gerrie Meares, Helen E. Young, Young, Frances R. Risk, Robt. P. Shanks, Lulla Risk, Annie M. Blake, Maggie Van Alstien, Gerrie B. Brown, Irving M. Cleghorn, David Duncan, H. B. Louer, John T. Little, George Thos. Wm. Webster, Nellie Brown, Alice J. Cameron, John H. Cameron, Alex. Emmett, Margaret F. McRae, Robt. McMoran, Mary Heritage.

The following received grade B on same examination: Lizzy A. Schultz, Mary Morrison, Mary Louie, Wm. H. Hutchinson, Ida Henderson, Georgina Bell, Lena Broath, Sara E. Noet, Addie Robinson, Rose Hillen, Mary Oliver.

Applications for certificates were considered and granted as follows: J. W. Armstrong, of Brandon, was granted a first class professional; Thos. B. Hodge was granted a non-professional 1st B, Mrs. Any Soley was granted a non-professional 1st A certificate and Miss Amy Johnson was granted a professional 3rd A certificate.

The Board then adjourned to meet at 8:30 in the evening, when the question of authorizing text-books was considered, and the various subjects were divided into groups and referred to committees who were appointed to examine and recommend at least two suitable text books in each subject as follows: Readers, Messrs. McIntyre, Hunt and Goggin; Mathematics, Classics and Bookkeeping, the Bishop and Prof. R. R. Cochran; science, Dr. Bryce, Prof. Cochran and Mr. McLeod; composition, grammar and literature, Messrs. Goggin, Hunt and Mr. McLeod; history and geography, Messrs. McIntyre, Dr. Bryce and Goggin; the college and teachers' examinations, the Metropolitan, Dr. Bryce, Prof. Cochran and D. McIntyre.

The committees are to report at an early date when the question will be considered, and a change in the text-books will likely take place at Christmas.

Prof. Cochran, Dr. Bryce and Mr. Goggin were appointed a committee to draft a syllabus for teachers' examinations, to report at a meeting to be held at 2 p. m., August 21st.

The City Council.

A HOT DISCUSSION OVER LARKIN'S PERMIT. Present the Mayor, Alders, Caldwell, McGregor, Hanbury, Evans, Russell, E. J. Grier, Murray.

Minutes of last meeting read and adopted.

COMMEMORATIONS.

From Lloyd bank, London, Eng., enclosing a blank to be filled out as to population, debt, revenue, etc., of the city.

From Bonded Fire Engine Company denying the rumor that they had burned any of the public roads of the 1000 feet of hose purchased by the city.

From Chief of Police, re: abatement of nuisance by the night policeman. Referred to License and Police committee.

From Hon. Jas. A. Smart, re: Municipal Levy. Referred to Finance committee.

Report of Smith & Sherrill re: title re: referred to the council.

That license for a pool and billiard tables to the Larches be granted.

That the application of the Western World be granted.

Official pay sheet of the city \$744.15 C.P.R. Telegraph 1.45

Letters from Nation, W. A. Macdonald and S. H. Bower be referred to city solicitor.

Partion of Wilson & Smyth be referred to council.

That communication of G. N. W. Central be referred to city solicitor.

That J. B. Fraser's account for planting trees \$240.00 be paid.

That photos of the new city hall, the Fleming block, new Post Office, McDonald block, F. N. Eaton's residence, Four mill, Experimental farm and five other photos be taken for the Western World.

The petition of Wilson & Smyth and others asking that the council do not allow Mr. Laid to establish a lumber yard and factory on corner of 8th st. and Pacific ave. Referred to motions.

J. H. Hughes, \$81.85
Pay Sheet, \$84.50
Re Larkin's title that his offer be paid on his title being certified.

P. C. McKinnon, \$8.65
That the drain north of 18th street bridge be cleaned out.

That a special meeting of the Board of Works be held to examine plans of city hall and if found correct the chairman to advertise for tenders for the erection of city hall and market building, tenders to be in on August 31st.

That plans of water works be referred to council. Report adopted.

LICENSE AND POLICE.

That acct of Earl & Co. be referred to council, the acct was for filling and cleaning a closet in the Molewouth block, \$3.00, ordered to be paid and charged against the building.

That J. R. Foster be appointed license inspector and that the Local government be notified of appointment.

That the Chief of Police, be provided with a suit of clothes. Report adopted.

the time for accepting his offer. Carried. Hanbury, Evans. That the letter of the Bonded Fire Engine and Rubber company be now gone into. Carried.

Ald. Russell said that Ald. Murray had said on the street that he (Russell) and the Chief of the fire department had made a commission on the purchase.

Ald. Murray denied the statement. He said after the tender was accepted Ald. Russell proposed to lower the other tender 5 cents a foot. He (Murray) said it looked as if somebody was making a commission on the deal.

Ald. Russell said he could prove it. Ald. Murray said he couldn't and asked the man's name who said that he said Ald. Russell was making a commission.

Ald. Russell said that Murray told it to Philip McKinnon.

Ald. Murray said he told Mr. McKinnon just what he told him to come to night. McKinnon must have misunderstood him.

Ald. Russell said he wanted to clear the Chief of the fire department in the matter.

Ald. Caldwell said that as there was no complaint from the Chief that they should not deal in the matter and that this important letter should be returned to the company.

The council then took up the amendment to the fire limit by law.

INSTRUCTIONS have been issued to all Crown timber agents from the Department of the Interior at Ottawa, to the following effect: "If a permittee wishes to cut a larger quantity of timber than is specified in his permit, it will be necessary for him to obtain a second permit to cover such quantity, for which he will be required to pay the regular office fee in addition to the dues, if any. And if the permittee cuts more timber than is specified in his permit, it will be considered that he cut the same illegally and double dues will be charged therefor. This rule must apply to both free permits and those subject to dues." It will be clearly seen from reading the above, although the department makes no charge for dry wood under five inches at butt end, save the office fee of 25 cents, all the regulations applicable to the cutting of other timber are in force, and must be observed, and further, it is equally clear that the department holds all persons returning permits responsible for the payment of double dues on all timber cut in excess whether on free permit or not.

MARRIED.

PANORAMA, WILKINS & Co. July 21st, 1890. At the residence of the bride, Mrs. R. D. Johnston, Elton, by the Rev. F. J. Out. M. J. Smith, Pastor, Veda Dale, to Minnie J. Wilkies, Veda Dale, Man.

STROME'S MAMMOTH

Dry Goods and Clothing House.

Great Value this week, our values unsurpassed, our qualities the best, and assortment second to none in the country.

1,000 yds of Dress Goods worth from 20c to 35c. Your choice for 15c per yd this week.

Prints, Satens and Ginghams at a sacrifice. 2,000 yds at 10c per yard. Many of these are just half price.

Wonderful drive this week in Ladies Cotton Hose.

STROME'S Clothing in his Mammoth Establishment has been a source of attraction. Our values in Suits, our Styles, our Fits are superior to anything offered in the city. We claim no opposition in value, styles and fits.

Our Clothing has a reputation far and wide to be the best in the City.

Never pass STROME'S Mammoth Establishment for a nobby Suit at small money.

Shirts, Collars, Ties, Hats and Caps. \$2,000 worth of Brussels Tapestry and Wool Carpets at Mill Prices. Money saved is money made, therefore go straight to

STROME'S MAMMOTH

Dry Goods and Clothing House, Combs & Stewart Block, on 9th street, and Ross Avenue, North Side

P.S. (1890) Eighteen hundred yds Cream Suesucker to clear at 5c per yard.

Unseen Evans. That the committee wait on Mr. Larkin and have him extend

From the following from the News Advertiser of Vancouver, it appears that he has got there all right. Mr. Archie Ferguson, on the train yesterday from Brandon, to occupy a position in business. Mr. Knight for some time played home for the Brandon Lacrosse Club, and he will no doubt prove a well come addition to the local team.

—A teacher in New Jersey was hearing her class in natural history recite, and calling up a bright-looking little girl, asked: "What is a ruminating animal?" "One that chews her cubs," was the innocent reply.

Rosser Avenue.

D. McVicar, - - Brandon

THE OR LOVE

BRANDON MAIL.

THURSDAY, AUGUST 7, 1890.

We see nothing now-a-days in the "Liberal" press, especially of Western Manitoba, lauding the Local Government for the "competition" they have secured for the province through the construction of the Northern Pacific Railway. Why is this? It is but two years since the agitators at Winnipeg told the people of Manitoba the rate on wheat from St. Paul to Chicago was but 7½ cents, and if we had another railway in the country the rate from Winnipeg to Port Arthur would be reduced to 7½ cents also, as the distance was similar. In the campaign two years ago on every possible occasion Mr. Greenway told the people of the province he was completing arrangements for a competing road that would save the farmers \$900,000 freight on a single crop. Surely after all this we should have some results the Grit press could hold before the people as an evidence of Reform veracity if not of Reform statesmanship, but like a sheep before its shears they are all as dumb as the dead. Why, we ask again, is all this? Is it a fact they know the government has sold the people and the country? If it is, why do they not come out like men and say so? On the small stations of the N.P. the freight on wheat was higher last year than the C.P.R. and though the wheat season is now upon us there is no move yet to reduce it—nothing but an evidence the competing road does not compete but merely pocketed the million dollars the Greenway government gave it, for making a discriminating rate to Winnipeg against the whole of the rest of the country. Is it not this and nothing more?

The escape of Goyette from the goal last Monday evening referred to in other columns calls up the boasted economy of the present administration. Mr. Martin boasts that he has made great reductions in the civil service, and the question now is has he not reduced efficiency thereby. In the days of Mr. Hannam's management as gaoler an escape was unheard of, and he had in his keeping many as daring and powerful a man as Goyette. It is true that on one occasion a prisoner, permitted to go outside, escaped from his guardian only to be recaptured in a couple of hours again—no escape from the cells ever took place. If the version we heard of the escape is the true one then there was gross negligence on the part of the gaol officials. The prisoner was allowed to have tools of some kind, cell doors were left open which should have been closed whether occupied or not, and other men doors that should have been closed were also left open. In Hannam's time there was of course a night watchman, but Mr. Martin was economical, and his services had to be dispensed with to the detriment of efficiency, as experience has fully proven. Again we say that Mr. Martin is such an adept at suspensions, even because his relatives profess to be interested here is an opportunity for him to indulge his penchant in that direction. Will he exercise it?

It appears to us that all that is done in the matter of bringing immigrants to the Canadian Northwest, is not done in the best interest of Canada as a whole. For instance there are some people who think that if only Ontario people can be brought to Manitoba, the best aim of immigration is fully suited, but this is a mistake. It is not clear that there are at the present day too many people in Ontario or any of the eastern provinces. It may be there are too many in some callings in all of the other provinces, but if the whole areas of each were cleared up and put under cultivation and proper occupancy, there are none of the provinces over populated. The effort should not then be to drain these provinces, but merely to secure for our own North West those of the settlers of those provinces who are in any way bound to immigrate somewhere. Let us open homes here for all Canadians who are bound to the States or elsewhere outside of Canadian Territory. The places in Ontario any who move here should as far as necessary or possible be filled by settlers from the Old Country, and it is only in this way we have the best results from immigration. There is no questioning the fact that to remove from the Old Country to Manitoba is too great a change for many Old Country farmers settle in Ontario where the ways of doing things are more natural to them, is more in harmony with the nature of things, while the industrious Ontario is the best possible settler for this country. It appears to us there ought to be a better understanding between the Provincial and the Federal governments on this head so the best results all around might be obtained from the money expenditures made.

Discounts should have been very cheap at the Merchant's Bank the past week, if the usual rule of dealers was followed out. It is customary for dealers to offer goods cheap before moving. The institution is now opened in Hooper's old stand until the new bank building will be erected on the old premises.

It seems to us more than ordinarily strange that the Brandon Sun has not a word of reply in its last issue, to our criticism of its defence of the N. P. extension, in its issue of a week previous. We charged the oracle with admitting the truth of all the arguments ever advanced by the Mail against the feasibility of the Grit arguments for competition through the N. P. Railway, and it dare not mention a word of reply. We quoted the Sun itself to show that all the arguments Greenway and his following put forth in his effort to carry the country two years ago, were but so many spurious words to catch incautious flies, that they were so many falsehoods made out of whole cloth to deceive the public, and that they did deceive the electorate, and the Sun has not a word of reply. We charged it with admitting the N. P. because of its eastern connections is in no position to give the competition the whole Grit fraternity declared it would give, and the Sun opens not its mouth. We charged the print with declaring out of its own mouth that the whole railway policy of the Grit government was a piece of the grossest deception upon the public from its inception, and by its silence the print admits we told the truth. This is the spectacle the print presents when basking in the sunshine of its own creation—a discredited print a discredited party and a discredited railway system, but the province is mortgaged for a million and a half of dollars to secure the latter. What do the people think of it?

COASTING.

So sang a maid of fair degree
Whose modesty forbade publicity.

Two, one.

See! from off the ocean rise
Imprisoned dews, so rare
High floating to the highest skies
On golden, glorious, air.

Steamy vapors rising fast,
Weird, fantastic, forms assume,
Fit like phantoms spectres past,
Opaline, as midnight moon.

Screaming gannets, seek and hide,
In, and out the shanty way,
Undulating as the tide,
Glide them down the steps of day.

Mount and foot-hill wooing stand,
Twixt the sea-fog, and the vale,
In loveliness, embrace, gently fade,
By soft, assuaging, gale.

Through the night so sweetly fine,
Shine the stars, and stars alone
This the hour for Gnome and
Mime.

For music, feast and love.

Santa Clara College, or University, is situated in the town of the same name, which place is connected by the celebrated Alameda road or way with San Jose. Santa Clara has a population of five thousand, San Jose, between fifty and sixty thousand. Santa Clara covers a great deal of ground and is more like a collection of fruit orchards and vineyards than anything else.

The Alameda was built under the direction of the Jesuits, and was a safe and comfortable passage from the Old to the New Mission against the attacks of the half wild cattle grazing upon the low rich lands in the vicinity.

Upon either side of the way was planted a double or triple line of trees, these have become fine large ones, and the Alameda is now one of the finest drives in the world. Wonderful residences adorn it, the architecture varying as much as the nationality of the builders. There is yet to be seen, and in good order, a ready-made house shipped from Spain, around Cape Horn.

The University is a Roman Catholic institution on belonging to the Society of Jesus. It is centrally situated and occupies a whole square; may be more. The building is what is known as adobe, or sun dried bricks, the walls of which are about five feet in thickness. High walls surround it shutting out the public gaze, and in its fruit, flowers and University work.

This is the home of the mission grape, and from here radiate the vineyards of California. The entrance to the building, and thence to the grounds is had through a handsome gate from one of the public streets. Saturday is the day set apart for visitors, we, however, were specially admitted on a Tuesday and politely guided and permitted to explore every part of the grounds and buildings by a devout Christian Father, whose politeness and refinement were only equalled by his evident erudition, and who lost no opportunity of enforcing a moral teaching with every new description, of course modestly confining for his own faith. It has a large efficient teaching staff, and an attendance of from three to four hundred students. It has also a preparatory school. All denominations are admitted, those of their faith are not interfered with, everyone may worship according to the dictates of conscience, under his own vine and fig—not metaphorically as the vines and trees are there. Methodists although not positively interdicted, are not encouraged particularly those under the influence of Irish pastors, who, originally intended for the priesthood, were converted to Methodism before completing their studies. The reception room is a long, dimly, religiously lighted one, the walls of which are decorated with fine steel engravings and oil paintings. The subjects are historical biblical ones.

Coming from an almost vertical sun, not yet rid of flannels and weight, the foot falls noiselessly upon a heavy piled cushion—the deep embrasures of the windows, mullioned and softened, protected on the outside by deep, green foliage, the mind glaucous with the superstitious ignorance of Protestants, and in the midst of the reverential movements and low spoken accents of the Fathers, compels a mental attitude not easily forgotten.

Criticising art is hardly in the line of a Manitoban, but one oil painting struck

me as being valuable. Perhaps it was a chromo, but from my stand-point it looked like oil. It was the presentation of the head of John the Baptist, on a platter or charger, to the daughter of Herodias. The obsequious prostration of the attendant conveying the charger; the scornful, haughty, well-controlled surprise, the manifest interest in the shocking and ghastly spectacle and over all that Roman or Romanized imperiousness that became so well the lofty and Queenly figure of Salome, the careful composition of the head itself, every feature perfect with its death hue; and the ghostly vivid pallor, truthfully depicted upon the countenances of the Jewish attendants (judging by costume) stretching and straining forward on tip-toe from the back ground, made it realistic in the extreme.

In the grounds are seen vines seventy year old, Palms of forty years, Cacti, and all young spruce, and flowers and fruit too bewildering to mention. There are specimens of old adobe tile, anciently used for roofing.

Ascending the first stair the library of thousands of volumes is reached, in it there are facsimile copies of MSS of the third and fifth centuries, rare volumes of controversial and other works, a parchment manuscript of church music done by a Father 170 years ago, bound in an iron cover that would require a Sanson Aquinas to lift. The hospital is clean and well ventilated. The dormitories, where are long lines of beds arranged with military precision, clothing scrupulously clean, ventilators by the score, and a ceiling of about eighteen feet height, is a model. The Laboratory is also complete in addition to ordinary apparatus, there is a small locked receptacle for each student. The Theatre, of which there are but two or three in the State, has an elaborate door curtain, is fitted with electric chairs, lighted by electricity, general equipment for the character of its entertainments, as put on by the Student-Actors. The college has Mineralogical, Law, Astronomical, Chemical and other departments. The play-ground or out-door gymnasium characteristic of the climate. Having done the secular part, our Cicero next introduced us to the New Chapel, where, before entering, he informed us in soft Italianized speech, we would speak in whispers. The first light of which we stood, we felt, was of ridicule, using like impression was that of ridicule, not remembering where we were, the land earnestness of the refined face of the Father, followed on tip-toe, into the sacred edifice. The Rev. Father knelt in silent prayer, and approached the altar by numerous and devout generations of which we were ignorant. The walls and ceiling are elaborately frescoed, it has some ornate mural tablets, rich memorial windows, some half dozen confessional stalls, and a magnificent altar, backed by a huge altar screen, a copy of one of the most celebrated in the world, done by the great Spanish Master Murillo.

Here the Rev. Father, who had spent some hours explaining and pointing out objects of interest, informed us that his prerogative was at an end, but that we ought to see the Old Chapel, at the end of which we stood. We politely bowed our thanks, after which, by some second thought he volunteered to complete the tour. The Chapel had been recently restored, the very planks used in the old church, with their crude Indian frescoing, coloring the altar in the new. It is rich in decoration and story. There reigned the quiet, sanctity peculiar to Roman Catholic churches, and passing down the richly carpeted aisle turned to take a farewell of this holy, calm, pervaded edifice, when our loved guide made a last and rapid exit, leaving us in benediction and prayer.

Then out through the great arched door we stood once more in the blinding sun, meeting in the street a bowed and bent Spaniard who devoutly crossed himself as he passed within.

Yours MANITOBA.

WOLSELEY.

Berry picking is the order of the day. Mr. E. H. Cook is visiting in the Methodist colony.

Mr. Park, inspector of homesteads, was in town on Saturday.

Mr. J. McLeod is on the sick list, typhoid fever is the Doctor's report.

A spring calf belonging to T. Ellis died suddenly on Friday.

Mr. T. J. Fleming had the misfortune to lose a valuable horse last week. It escaped from Bamberg's ranch and is supposed to have crossed the boundary into Indian land.

J. P. Dill has sold his lot on Sherbrook street to T. Ellis.

Mr. Geo. Hurlbutt has erected a commodious building on Sherbrook street to be used as a blacksmith shop and carriage factory.

Some of the enterprising ladies of Wolseley have formed themselves into a Ladies Christian Aid Association, may success attend them.

We are sorry to record the death of John Wesley Fleming, who was drowned while bathing on the 26th ult. The deceased was the son of Mr. Samuel Fleming of Sunnyside. He was a highly popular young man. The funeral which took place on Monday was attended by all the honours of the Orange Association of which he was a prominent member. The sorrowing family have the sympathy of the entire community in their sad bereavement.

Revival services have been held in the Presbyterian church during the past three weeks by which much good has been accomplished.

Work on the school house has been commenced; the contract was awarded to William Campbell through favoritism of the trustees, as we know there are other persons in this section who would put up the school building for from one hundred to two hundred dollars less than what they are paying the present contractor.

HAIL STORM LAST NIGHT.

BOISEVAIS, Aug. 2.—Another heavy hail storm came from the west last night. All the crops south of the railroad track are spoiled, but all north of the track are safe.

LATER.

BOISEVAIS, Aug. 2.—The storm is not as bad as expected. Considerable grain is safe south of the track. The north side is all right from the storm.

LEARNED IN THE CITY.

A leading firm in the city, whose agents are scattered all along the line of the Deloraine branch, reports that the damage was pretty bad south of the track in townships two, three and four, ranges 19 and 25. A gentleman connected with the firm remarked, very truly, that the tendency was to overestimate the damage. One report states that the wind, not the hail, did the damage. If this is so, part of the grain may possibly come back. The best districts have been visited, and no doubt considerable damage has been done.

LOTHAIR.

Owing to quietude in the district and other causes beyond our control, it is some time since Lothair has been written up in the MAIL. However, a mysterious something calling itself an interviewer has been keeping the world informed on what is doing here through the medium of the Times.

School was closed for two weeks owing to the absence of the teacher who was in Winnipeg writing on a departmental examination. He returned about two weeks ago and re-opened on the 21st.

Mr. N. Hays, who was burned out in the early part of the summer, has rebuilt his house, about three weeks ago it was warmed up by the young folks who, pointed the light fantastic toe until morning. Music was furnished by Messrs. Anderson and Love.

Mr. A. D. Chisholm left Griswold on July 11th for Ontario to buy horses. He got a car-load and was back to the station with them on the 24th. The demand for horses is so great that they were all sold in the night. We understand he has another car-load coming.

Crops in this section of the country are extra fine in appearance. We have a hope of a bright on the wheat but it is not very bad.

Our foot ball team expected the Pemmican team to be on hand for a match on the 26th but they failed to appear.

School report for term ending June 30th:

Fourth Class. 1 Will Richardson; 2 Bessie Bailey.

Third Class. 1 Malak Richardson; 2 Robbie Blatchford; 3 Beatrice Kroy.

Second Class. 1 Flo Wood; 2 Levi Pullan.

Senior First—1 Garfield Ferguson; Junior First—1 Delson Chisholm; 2 Lizzie Wood; 3 Ida Pullan.

Regular Attendance. Fanny Blatchford, Punctuality. George Ferguson.

Present every day in July Fanny Blatchford, Peter Reid, Willie Perkins.

SMOKE VS. FROST.

Pilot Mount Sentinel: Winnipeg papers have been giving prominence to Mr. Richard's theory of preventing injury to grain fields from early frost by the use of smoke. If Mr. Richard, or others, could observe the smoke rising from a locomotive as the engine stands at a country station on a calm evening, they would be satisfied that no benefit could be expected from such a slight influence on so large a surface as a grain field presents. If a fire was sufficiently large, and well kept up, perhaps a garden might be protected from frost by smoke, but in the case of wheat fields that often consist of several hundred acres, nothing short of a volcano would be of any service. We could improve on Mr. Richard's plan by providing that wagons might be fitted with iron boxes in which proper smudges would be kept burning. The wagon would then be drawn around the field or through it during the night. There is, however, no need for such experiments and it will not tend to establish the character of Manitoba as a wheat producing province to have such papers as the Winnipeg dailies advancing and approving of proposals to ward off the evil effects of frost by the use of smoke. Excepting 1888, losses from frost resulted chiefly from late sowing. The promise of the C.P.R. Co. to give a rebate of so much an acre on all land purchased from them and cultivated caused many farmers in the railway belt to sow more land than they were able to get ready in time. Until lately early frosts were unremembered, and most likely will not occur again for some years to come, and it should be remembered that even in 1888, which was the worst season for frost, a very large quantity of excellent wheat was exported from every district in the province, and that in many portions of Manitoba fields were unharmed. The use of good seed, careful cultivation and early sowing will be more to secure good crops than Mr. Richard's theory, which will end as it began, in smoke.

The Victoria Colonist says: After many trials by more or less skilled men, the highest peak of Mount Sir Donald on the C.P.R. has at last been ascended by Huber and Sulzer, both Swiss and members of the Alpine Club of that country. They came high up the mountain side, and after travelling over the Glacier and ascending Eagle Peak, they decided upon the means of ascending the giant of those ranges, and on Saturday made the effort. They accomplished their climb in seven hours from their camp, but were much slower in regaining their starting point. They declare that the Government estimate of the highest of the Rocky Mountains is too small by 50 or 60 feet, but that they will add all data and photographs obtained on the trip for reports to the Dominion Government and to their club journal at home. They will start to-day to attempt the ascent of a high peak of the Hermit range. They report the climb to the top Sir Donald as more difficult than any they have made at home, not excepting the Jungfrau.

OPENING OF SPRING & SUMMER CAMPAIGN, —AT— PAISLEY & MORTON'S McDIARMID'S BLOCK, BRANDON, MAN.

With Piles of NEW GOODS, at Prices so Low that Customers forget the hard times, a little money buys lots of Goods at our Store.

Come to Stay!

THE SYLVESTER BRO. MFG. CO.,

OF LINDSAY, ONTARIO,

HAVE opened our Warehouses on 9th Street, in Building formerly occupied by Cochrane Manufacturing Co. in the Town of BRANDON, and purpose keeping in Stock a Full Outfit of

FARM IMPLEMENTS

AND

MACHINERY,

INCLUDING

Hamilton's Waggon and Buggies,

THEIR

NEW STEEL BINDER

Is a marvel of excellence, and guaranteed to give the best of satisfaction.

Those placed in the field last season in Manitoba proved themselves to be the best in the market.

Farmers would find it to their advantage to place their orders for one of these superior Machines at once, as only a limited quantity will be placed on the market this season.

We will also keep in stock a Full Line of the AMERICAN JOHN DEERE PLOWS, and Reapers for sale.

We would respectfully ask you to call and examine our Implements before placing your order elsewhere.

POINTS OF INFORMATION.

It takes about three seconds for a message to go from one end of the Atlantic cable to the other.

A horse walking at a smart pace strikes the ground with a force equal to a ton every time he puts down his foot.

Of the four generally used points only the period is dated earlier than the fifteenth century. The colon (:) is said to have been first introduced about 1485, the comma (,) some thirty-five years later, and the semicolon (;) about 1570.

Ammonites, from which many medicines are made, and which is sometimes used to flavor wine, is merely the dried secretion of the liver of a sick sperm whale. It is a fatty, waxy substance, disagreeable to sight or touch, but even in its crude state exuding a pleasant odor.

Vikings is a name given to the pirates of the North Sea who infested the British Islands and other localities in the eighth, ninth and tenth centuries. The word is derived from the Scandinavian *vika*, a bay, and these men were so called because their ships did not look like king's ships, from the anchor, but from the bay.

The training of carrier pigeons begins as they are strong enough to fly. The young birds are taken, in a covered basket to a place about half a mile from their home, and set free. Those who do not go home are considered worthless; those which do so at once are tried again, the distance being increased each time, until it is found that they will go back to matter how far they may be carried. The messages conveyed by these birds are usually written or photographed on very thin paper, and tied around the leg or one of the tail-feathers in such a manner that they do not impede the flight of the birds.

The name William was not at first given to children; it was a name conferred upon a man as a reward of merit. When the ancient Romans fought with the Gauls, the Gauls were armed only with light weapons, swords, spears, shields, etc., and if a Roman killed one of the Gauls he was rewarded with a golden helmet. The helmet was set on the head of the brave Roman who had slain his enemy, who ever after was known as *Gulhelmus*, or, as we would say, Golden Helmet. Among the Franks, the name was *Guldhelm*, and with the French, *Gullicheume*, afterward *Gullicane*, and with the Latin-speaking nations, *Gullemus*. Finally, the French *Gullicane* became English *William*.

EDUCATIONAL EXTRACTS.

There are about 12,000 students in the schools of science in this country.

In 1890 America had more colleges in proportion to the population than she has now.

Japan gets from New York every year 50,000 American school-books for its public schools.

The American College and Educational Society refuses to aid men who use violence in any form.

The Indian training school at Carlisle, Penn., has now enrolled 728 scholars. At the recent commencement there were eight graduates.

It is proposed in Chicago to engage a matron for every school building in the city, whose duty it shall be to look after the physical well-being of the pupils.

The senate of the Toronto University, Canada, has received a gift of \$2,000 from the American Association for the advancement of science and for the encouragement of the study of physics.

In Hayti, public elementary education is free, the country being divided into fourteen "communes" districts. There are 400 National schools, several private schools, and five public lycées.

There were 22,760 white and 13,004 colored children enrolled in the public schools in the city of Washington for the year 1890. There were 235 colored and 428 white teachers, and the total cost of instruction was \$287,455.52.

A new school law has gone into effect in Manitoba which has the effect of abolishing all separate schools, or at least of withholding State aid from such schools. The new law establishes a public school system very similar to that of the United States.

In Paris there are five professional schools for girls. The course of instruction embraces modern languages, domestic economy, industrial designing, cutting and fitting garments, and accounts. Each school is equipped with a kitchen, and workshops for making bonnets, feathers and other staple articles of trade. Girls are admitted at fourteen and remain for three or four years.

FOR PEOPLE WHO TRAVEL.

Take one-fourth more money than you estimated expenses.

Keep your eyes with the geography of the route and region of travel.

So anxious as to have but a single article of baggage to look after, if possible.

Put your purse and watch in your coat pocket and all under your pillow, and you will not be likely to leave either.

Have a good supply of small change, and no bill or piece higher than ten dollars, that you may not take counterfeit change.

Do not begin a day's travel before breakfast, even if it has to be eaten at midnight. Dinner or supper, or both, can be more healthily dispensed with than a good warm breakfast.

Buts substantially. Better to be late for two or three hours at noon than to be late for the remainder of the twenty-four. Arrange, under all circumstances, to be at the place of starting fifteen or twenty minutes before the time, thus allowing for unavoidable and anticipated detention on the way.

The best if not entirely secure fastener of your chamber door is a key on the inside; if there is none on, lock the door, turn the key so that it can be opened partly out, and put the wash tub under it; thus any attempt to use a pick or another key will crack the door and cause a racket among the croaking which will be pretty sure to rouse the sleeper and rout the robber.

PARAGRAPHIC PLUNDER.

A CHICAGO girl procured two marriage licenses the other day. She married one of the young men and will be a sister to the other.

There is talk of a Southern watermelon trust. Like most organizations of this kind it will soon engender internal dissensions.

A BARBER in Wellington, Kan., has put out his sign as follows: "We are here to stay. No favoritism shown; clean towels used on every customer."

"PLEASE excuse Alfred for being late," wrote a Hildeford mother to her boy's teacher, adding in an explanatory way: "He had shad for dinner."

There are 2,700 courts in the United States engaged in granting divorces; but, on the other hand, there are millions of courts which mean marriage in the near future.

A WESTERN Massachusetts dentist is said to have a small boy sit in his office and yell at the top of his lungs occasionally. It lends an air of business to the establishment.

EXHIBITORS who won medals at the Paris exposition are receiving diplomas specifying the class of medals which they are entitled. If they want the medal they can get it for spot cash, ranging from about \$133 for gold ones to less than \$1 for nice little ones in bronze.

As exchange says: "Now is the time to darn your hammocks." Many people "darn" their hammocks when they break down and many others use a still stronger expetive at such times. It depends upon the force with which the occupant of the hammock strikes the earth.

At Saco, Me., the other evening, a party who had spent an hour and a half in serenading a newly-married couple, and vainly trying to get the groom to respond, were at last thanked for their music by the bridegroom's father, who informed them that his son and daughter-in-law were in a neighboring village.

The *Norristown Herald* has heard of a third-rate show, consisting of a clown, eight horses, six performers, two leopards and grand venders, which goes by the grandiloquent name of "Blank's Triple Belomoth Unsurpassed Shows, Wild West Amphitheatre, Renowned Cirque and Marvelous Equestrianism."

NATURE plays queer tricks with the flower seeds sent out by the Agricultural Department at Washington. A man who received a package of seeds labeled "giant pansy," planted them in a flower-bed and soon had a small crop of turnips, while a number of seeds labeled "double pink" produced long-neck squashes.

The whole secret of the Kelly motor has been explained by the inventor himself. What can be more lucid than the following: "There is a triple sympathetic order of vibration diverting the positive and negative currents to a general polarized center; this rotary action is continuous when sympathetically associated with the polar stream."

A VENERABLE and pious-looking colored man, who might be a church deacon, was riding in a car of the Sixth avenue elevated road the other evening, when one of the passengers loudly uttered the magic number "Four—eleven—forty-four." The sleeping negro started up, as if touched by a live wire, gazed vacantly around, remembered in a moment where he was, looked sheepish, and dropped off to sleep again.

BITS ABOUT FLOWERS.

BALSAMS can be used for decorative purposes if grown in pots in light, rich soil.

For lilies on the rose bush use white hellebore, and use the same for the current worm.

PINKS should be supported by stakes to preserve their bloom in perfection and unsoiled.

THUNDERBIRDS are very pretty and easily grown annuals and are worthy a place in every garden.

ANEMONES will bloom all the finer, if no seeds are allowed to form during the summer. This really applies to most flowering plants. Always remove the fading bloom.

FANCY flowers, or corsage bouquets the amateur should have geraniums, gladioli, lilies and tuberoses. All of these stay fresh for a long time after being picked even without water.

RIES when done flowering may be lifted as soon as the leaves begin to wither. Place them in clumps in a shady place, with a little soil over their lower parts to ensure perfect ripening.

PIREX and plants of similar growth should be pinned down early in the season to make them cover the ground. Pins can be made from wire by cutting in suitable length and bending in hair-pin shape.

STARS of elder and other hard-wooded plants may be rooted in the simplest way by setting close together in a low vessel nearly full of a puddle of sand. This is to be put in a light, warm place, and the sand kept very wet.

ROSES should by all means receive clean culture. The surface of the bed must never be allowed to become grassy, nor to bake nor otherwise get hard. Every week or two during the growing season, or after every rain, the ground should be stirred with hoe and rake, and not a sign of weeds nor grass be allowed.

INSECTS are the dread of the rose grower. Let it be borne in mind that it is the under-fed and otherwise neglected plants that invite the largest numbers of pests. Prevention in the way of a quick, early, and carefully tilled soil, fertility, watering, pruning, etc., should therefore be the first resort against their attacks, and thus nearly all trouble will be cut off.

The hybrid perpetual class of hardy roses give the best general satisfaction to the careful cultivator. They are not in reality prepared and clearly tilled soil, fertility, watering, pruning, etc., should therefore be the first resort against their attacks, and thus nearly all trouble will be cut off.

Bermuda Bottled.

"You do not know me, but I will not be responsible for the consequences." "But, doctor, I can afford neither the time nor the money." "Well, if that is impossible, try

SCOTT'S EMULSION

OF PURE NORWEGIAN COD LIVER OIL.

I sometimes call it Bermuda Bottled, and many cases of Consumption, Bronchitis, Cough

or Severe Cold I have CURED with it; and the advantage is that the most sensitive stomach can take it. Another thing which recommends it is the stimulating properties of the Hypophosphites which it contains. You will find it for sale at your Druggist's, in Salmon wrapper. Be sure you get the genuine.

LOCAL NEWS.

Lisgar Lang is visiting in Winnipeg this week.

Capt. Whilaw, of Winnipeg, was in the city on Tuesday.

The Carberry fall exhibition will be held on the 9th and 10th of October.

Smith & Sherrill have 3 car loads of American Deering Binders to arrive Friday the 8th.

Douglas correspondence and other matters held over owing to illness of some of our compositors.

R. E. A. P. Leach, of Cornwallis, will commence cutting wheat this week; cutting still be general next week.

HILLIARD Leach has purchased a residence for himself on Seventh street from E. G. Wessel at a good figure.

The Sacrament of the Lord's Supper was administered to a large number after the evening service in the Methodist church on Sunday.

THERE was an error in the Saturday Night local column last week. Stewart Campbell and Herb Ryall are not coming down from R. C. to play with the Brandon's.

As will be seen in the Council report, there is being a big kick raised over permitting C. A. Larkin to erect a factory on the avenue as it would greatly effect the risk and insurance rates.

A large number have taken advantage of the offer of the Family Herald and Weekly Star, Canada's greatest weekly family paper, 3 months for any order for 20 cents. The list is still open at Cliffe's Bookstore. Everybody has a good word for the paper. Try it. 3 months for 20 cents.

The first number of the Rapid City Reporter, late Vindicator, came to hand on Saturday and under its new management it is a decided improvement both in make up and news items. The editor made a very graceful bow before the Rapid City people in his editorial leader.

Ten little red cherries that are found so plentiful in every field and the native raspberries are receiving great attention from the housewife these days. There will be an abundance of cherries later on. It is said that raspberries are selling at one dollar a bushel in Minnesota. Here the Indians have checked enough to refuse any offer less than 25 cents per bushel.

Mr. F. B. McKenzie has perhaps the best fitted up laundry in the country in the cellar of his new brick shop on 26th street. The oven itself is an immense one built of brick on the most improved plan, the collar is large and airy and the whole surroundings scrupulously clean and all in the hands of a skilled workman.

The Rev. Mr. Roy, of Qu'Appelle, after doing some business with Mr. Hesson on Monday, and in attempting to board the train while in motion, came near losing his life. He grabbed the railing but missed his footing and was dragged several yards until Mr. Hesson's motions stopped the train. Fortunately he was not seriously hurt.

By the escape of Goyette's brother Peterson seems to be done out of a job in which he could distinguish himself. There is no doubt but that Goyette remained in his cell with all the facilities at his command for escape, and with such overpowering evidence against him, Mr. Peterson could have secured his conviction and established his reputation as a criminal lawyer.

The Council are having part of two editions of the Western World devoted to Brandon's advantages and some views of the most prominent places of interest. A view of the Experimental farm, the Fleming block, new Post Office, new City Hall, E. Nation's residence, Ald. McGregor and Edgar's residences, McDermid block and a few other pictures will be taken for it. The Rev. Geo. Rodlick's homestead is also favorably mentioned as being a neat farm scene.

Chief of Police Foster seems determined to rid the city of cattle and horses running at large. He has a man on the streets picking up loose animals wherever found, and already there is a good list of them impounded. This is right and proper. No doubt a man feels sore when his cattle are held for damages, but has not the man whose property is destroyed by such animals a right to be so? When ornamental trees are destroyed, for instance, can they never be replaced to the satisfaction of the owner? A tree may be put out in place of the damaged one the following spring and it may die. It may again be replaced the following season, but it will take years for it to overtake in ornamentation the rest of them in the garden.

Last Tuesday afternoon a number of young ladies and a few favored gentlemen from the city, repaired to the grounds near 1st st. bridge, to spend a few hours in true rustic style. The shady nooks, the sunny beach and warm water of the Assiniboine, the croquet and base ball, and the happy spirit possessed by all present, and perhaps most of all the artistically arranged tea made the afternoon pass more pleasantly. Towards the close of the day while all were heartily engaged in a game of girls' baseball, some persons, perhaps not favored young men, possibly some of the press fraternity, as they sometimes possess the staff of which check is made, concluded they would have their share of the picnic in robbing the baskets of contents sooner than allow the musketeers to be known and get a lunch to a manly way. But as there was only part of a plate of hamlet pieces, intended for the gophers and of which they had already eaten to some extent, within their reach, the young ladies, hoping their young gentlemen enjoyed their evening meal. They evidently did so, for after all had gone they were seen hovering around looking for more. Boys, play the next kick more slyly.

A large portion of the C.P.R. depot, Winnipeg, was destroyed by lightning last Friday night.

FACTS ABOUT LEAVES.

Specialty Modified by Nature for Some Particular Purpose.

Even the most cursory observer of vegetable life must have been often struck with the various forms of leaves. Why they should be so variously formed does not, however, often suggest itself, though there is a reason for the special shape and texture of almost every leaf in existence. Plants, such as grasses, daffodils and others which usually grow in clusters, have generally narrow leaves growing upright, so as not to overshadow one another. Other plants, of isolated habits, have an arrangement of foliage which secures to themselves the space of ground necessary for their development. The daisy, dandelion and shepherd's purse—which may mostly be seen in pastures—are examples of this. A circle of broad leaves pressed against the ground, forming what is known as a rosette growth, effectually bars the approach of any other plant and keeps clear from all other roots the space of ground necessary to its own nutriment. Floating leaves, and leaves of marsh plants, are usually of simple outline, for, having few competitors, they are not liable to get in another's light. Submerged plants have mostly leaves of narrow segments—the reason for which is not very well understood, though it is assumed by naturalists that it is for the purpose of exposing a large surface as possible, in order to extract the minute proportion of carbonic acid dissolved in a vast bulk of water. Leaves on the boughs of trees are often much divided, so as to fold easily, to prevent their being rent and torn by high winds, while the glossy surface of evergreens is intended to throw off rain and dew, which might freeze on them, and so cause injury to the tissues within. But the hairs on the surface of leaves are perhaps the most interesting study of all. With the aid of a microscope, the beautiful and systematic arrangement of these can be easily discerned, and their uses understood. On many plants there are glandular hairs, to catch or deter small creeping insects; on others there are hairs set so as to act as effectively against young animals as a spile placed against a door; on boys; on others, hairs which arrest the drop of moisture and force them down the leaf-stalk, to moisten the earth about the roots; while others are protected by a series of poisoned stings. The ordinary nettle is an example of this, and the beauty and ingenuity of its mechanism is truly wonderful. Each nettle hair is armed with a brittle and pointed siliceous cap, which breaks off in the wound; and the poison is then able to flow out through a tubular hair, from a reservoir at its base. There is scarcely a form of leaf but is specially modified by nature for some particular purpose, and the discovery of this purpose is a source of very pleasant, as well as profitable, study. —Horticultural Times.

The German Emperor's new rules for wearing uniforms in the navy fill a book of forty pages.

MAIL CONTRACTS.

SEALED TENDERS, addressed to the Postmaster General, will be received at Ottawa on 11th noon on Friday, 24th September next for the conveyance of Her Majesty's Mails, on proposed contracts for four years over and above the following routes, from the 1st October 1890: Brandon and Two Rivers, twice per week, computed distance 22 miles. Broadview and Railway Station, twice times per week, computed distance 18 of a mile. Assiniboine and Railway Station, twice times per week, computed distance 18 of a mile. Printed notices containing further information as to conditions of proposed contracts may be seen by applying to the Tender obtained at the Post Office at the terminal of the respective routes and at this office.

W. W. McLEOD,
Post Office Inspector.
Post Office Inspector's Office, Winnipeg,
July 26th, 1890. Aug 7-3t
